

# Smart energy for communities **Prosumers, unite!**

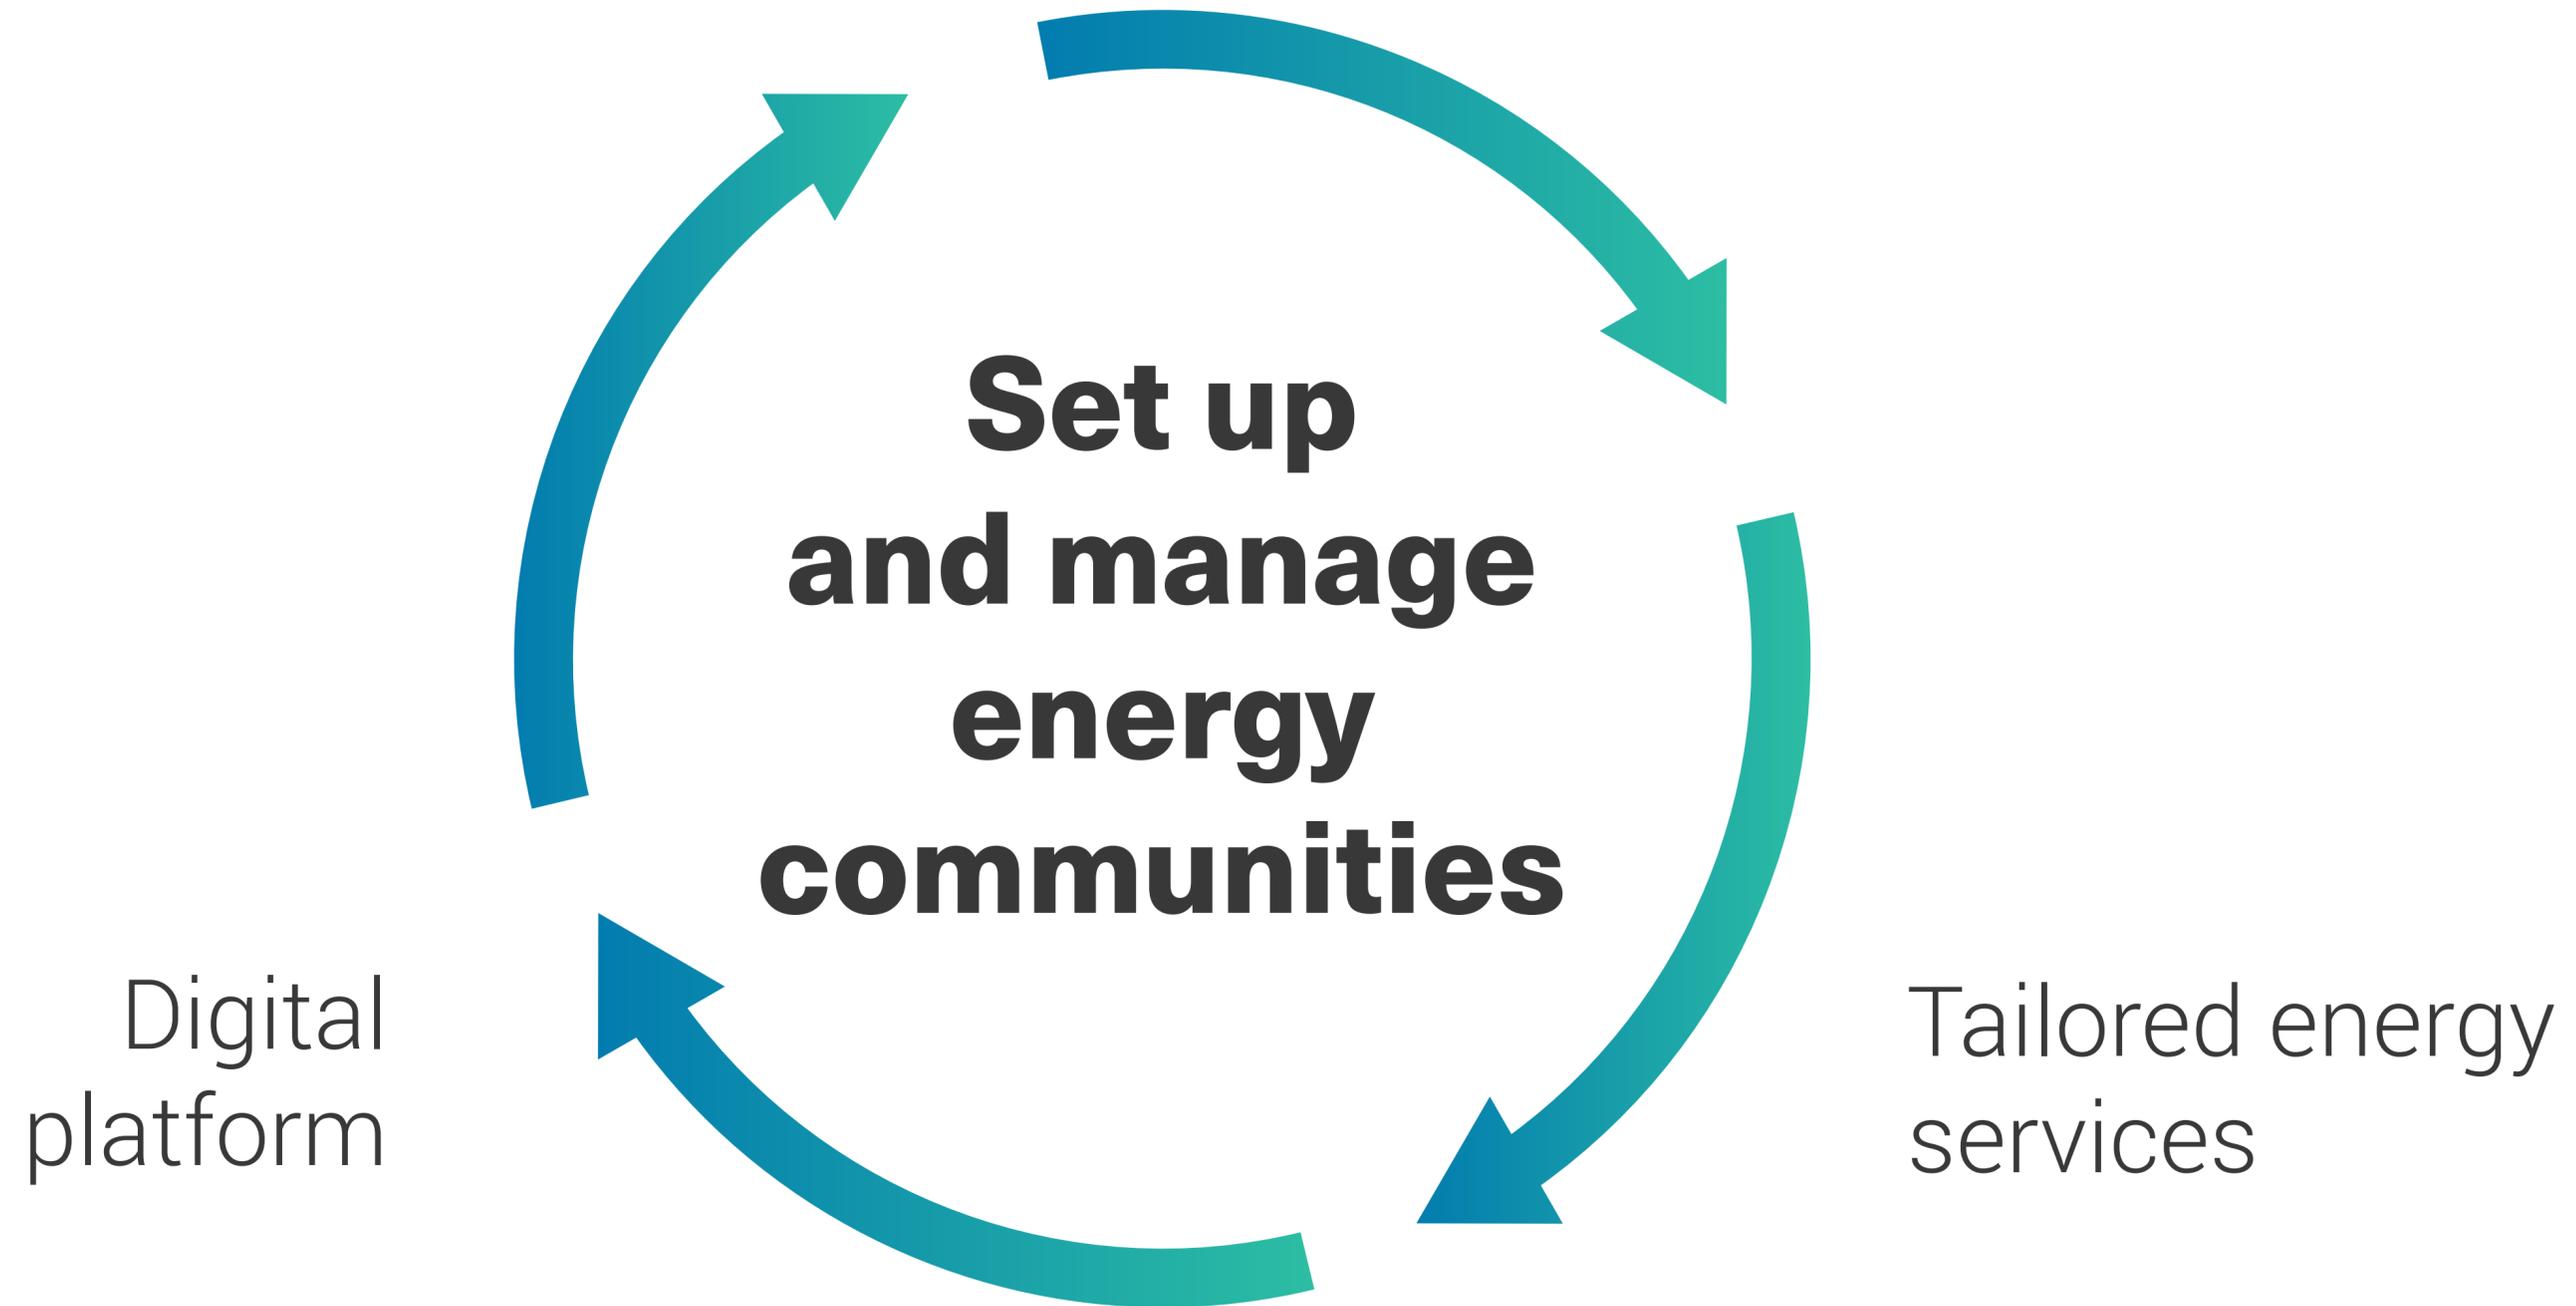

CREATED ON NOVEMBER 2019

# A new decentralized energy world

# Our value proposition

# Our value proposition

**1. Creation** of the energy community

**2. Measurement** of energy data flows

**3. Mutualization** of energy production, storage and consumption

**4. Forecast** for savings, proposals for improvements

**5. Participants engagement** to save energy and protect the environment

**6. Participants rewards** with incentives and gamification

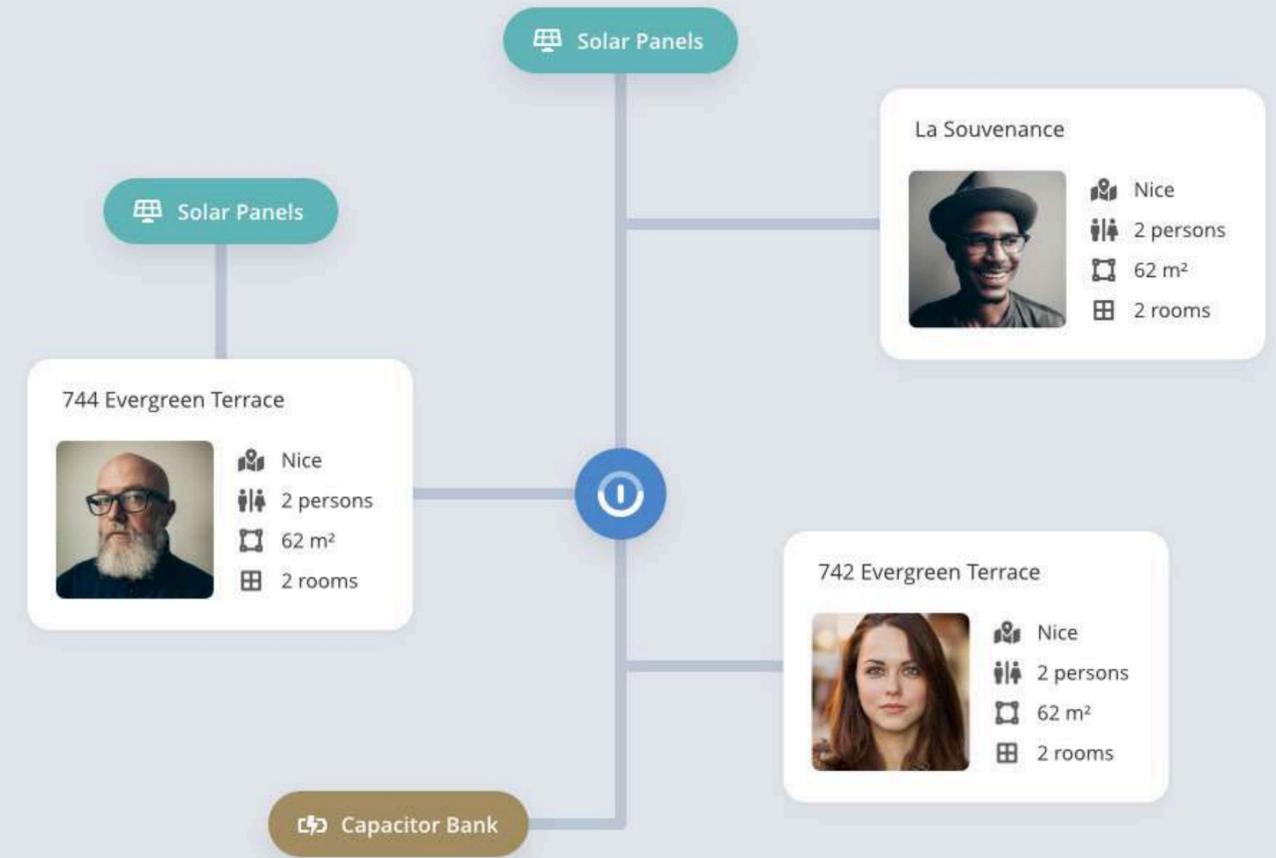

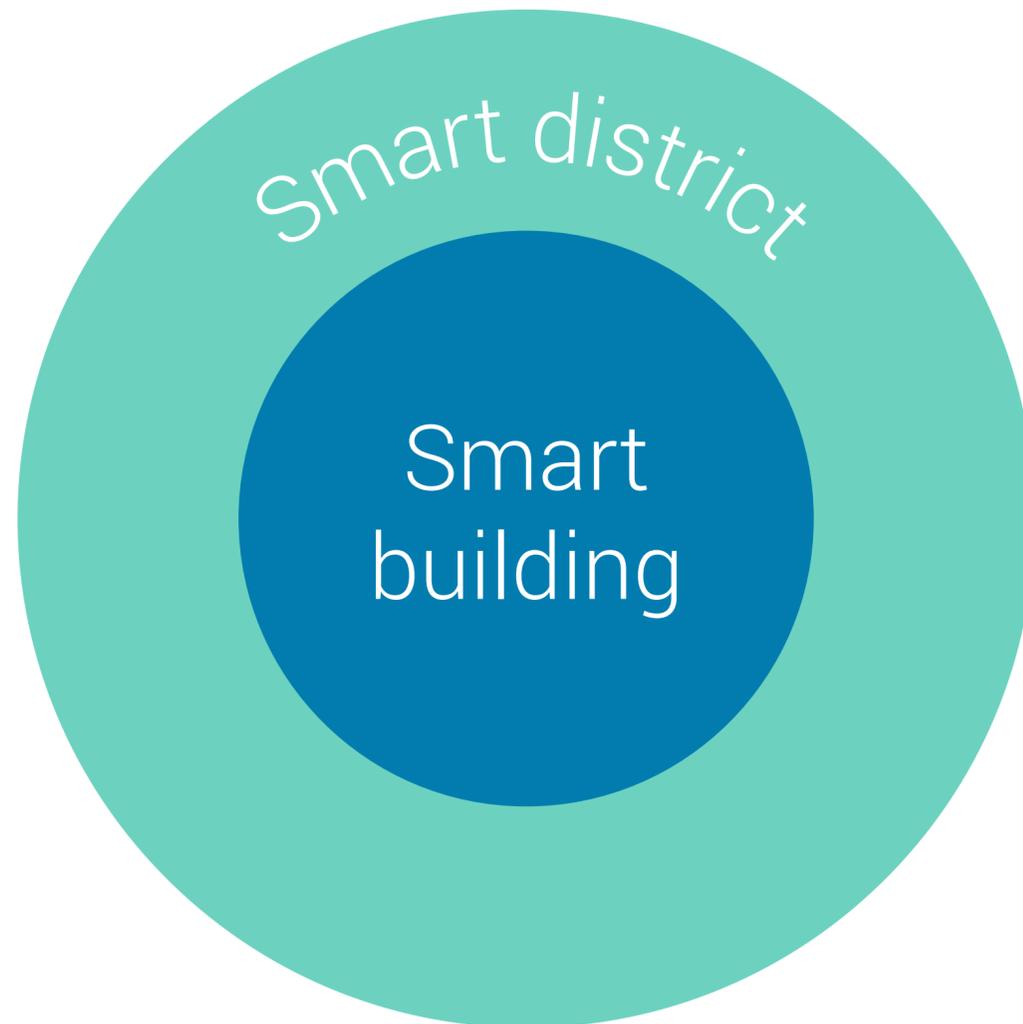

# Stronger together

Our difference: **Strong user engagement**

One organization and/or **Multiple organizations**

Single user and/or **Energy community**

# Make the world a better place

Savings

Care for the  
environment

Community  
sense

Better  
image

# It's a great time to act. Prosumers, unite!

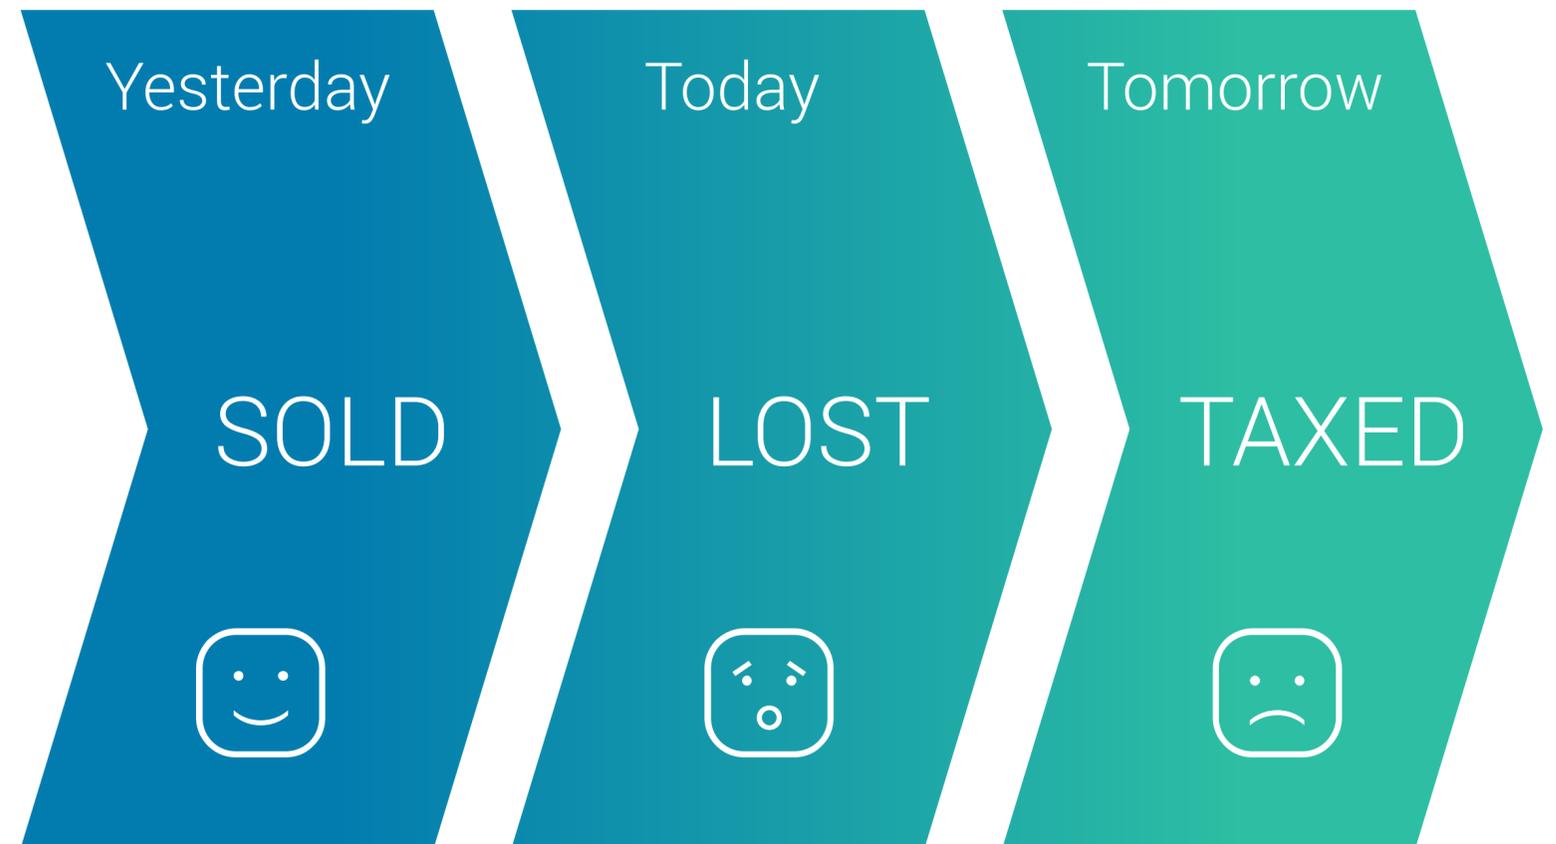

**Goal:** mutualise your renewables to reduce your dependency to an ever more expensive centralized energy.

## The energy you buy

Energy price rising

## The energy you make

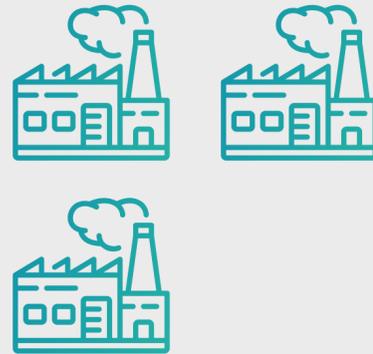

# What community are you?

Examples

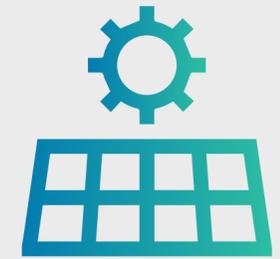

Configuration 1

**3 factories**

Configuration 2

**1 building +  
collective solar**

Configuration 3

**3 residencies**

Configuration 4

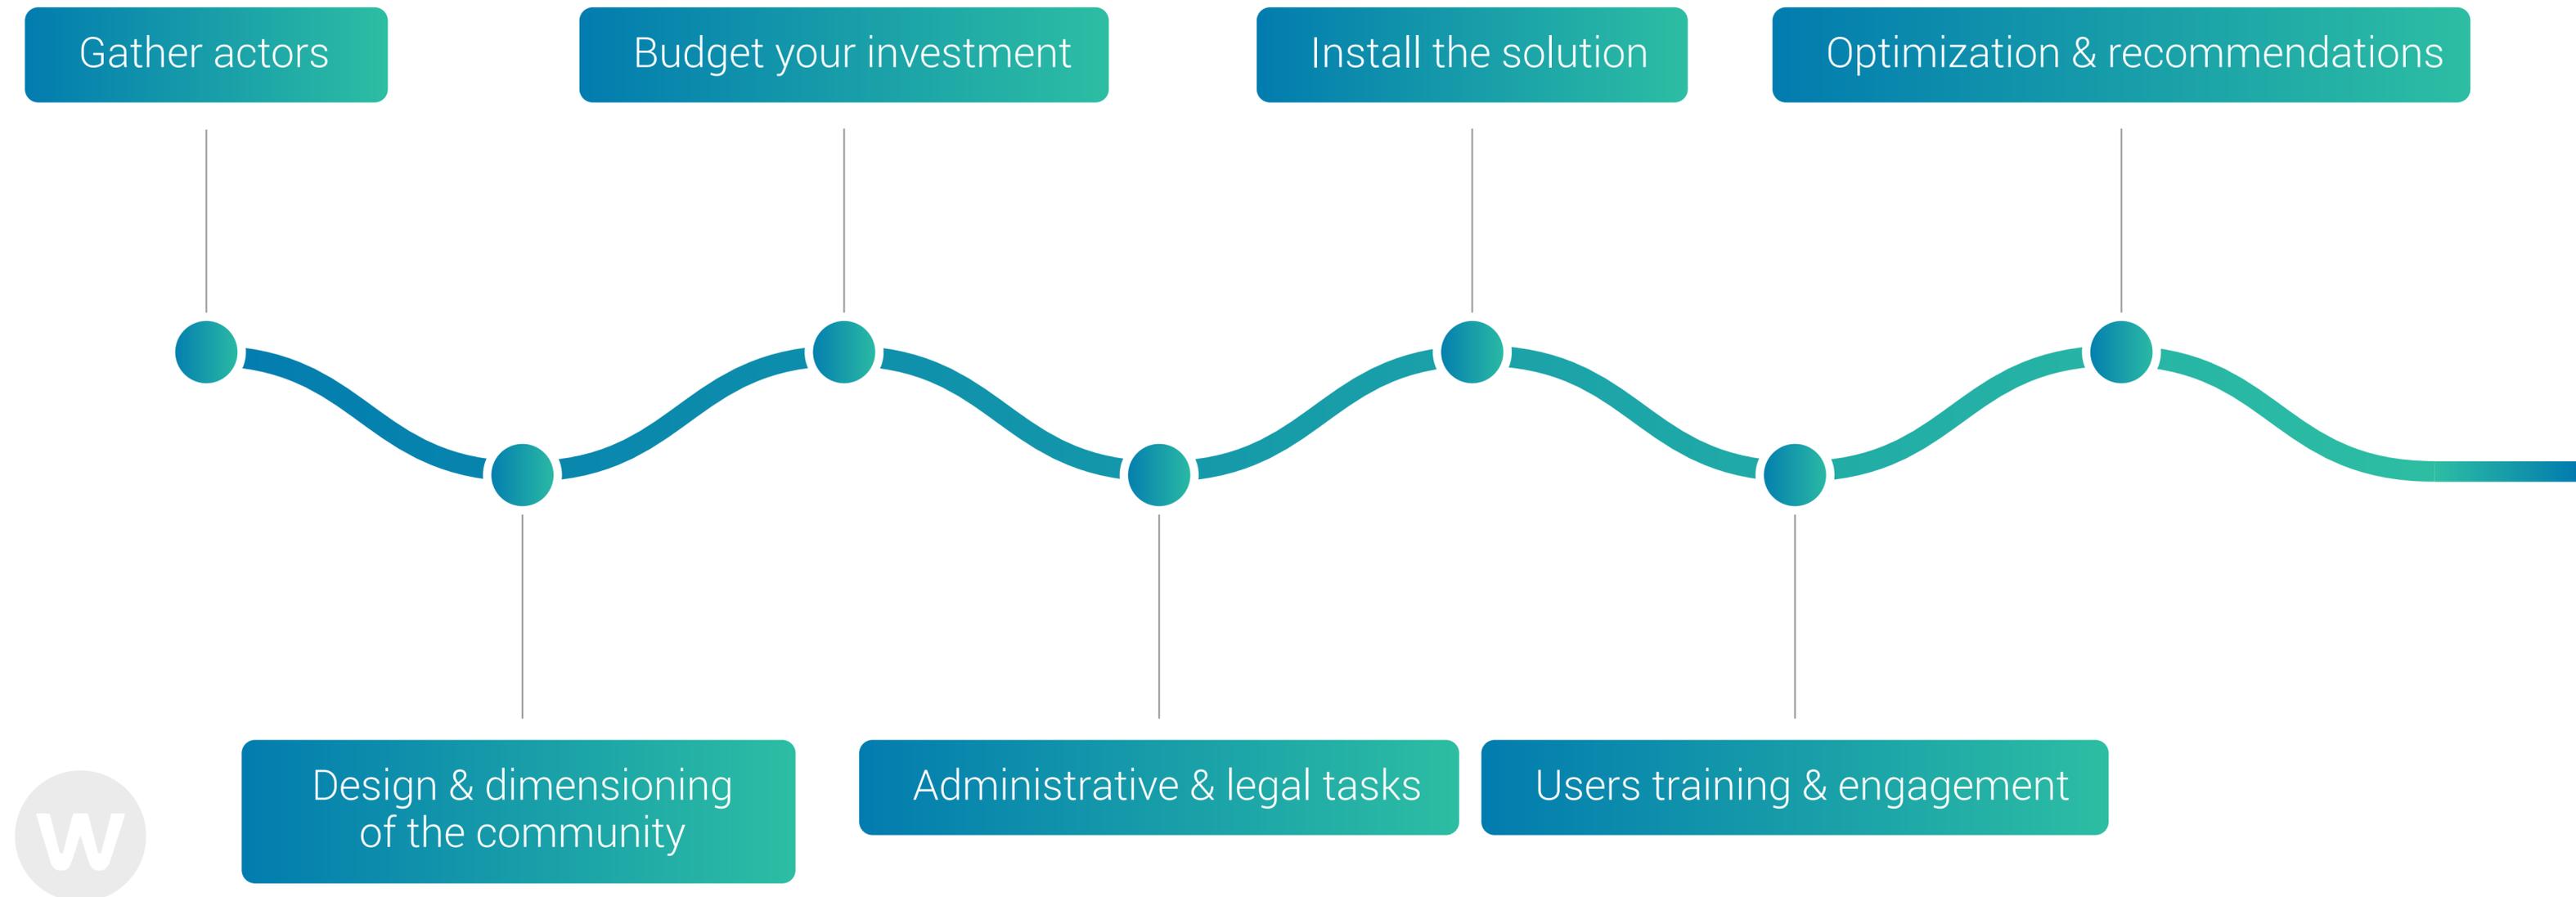

**Ecodistrict**

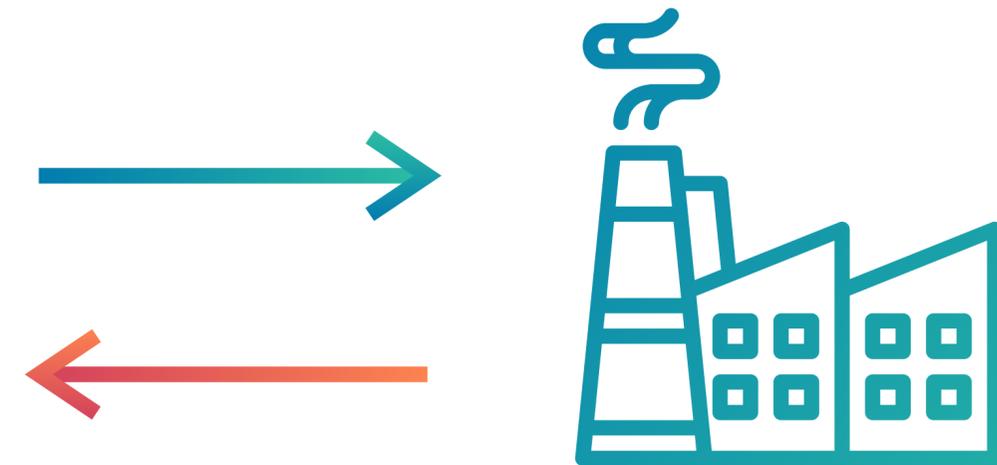

# Build your community

The 7 steps

WeSmart helps you **setup your community every step of the way**

# My community is now live!

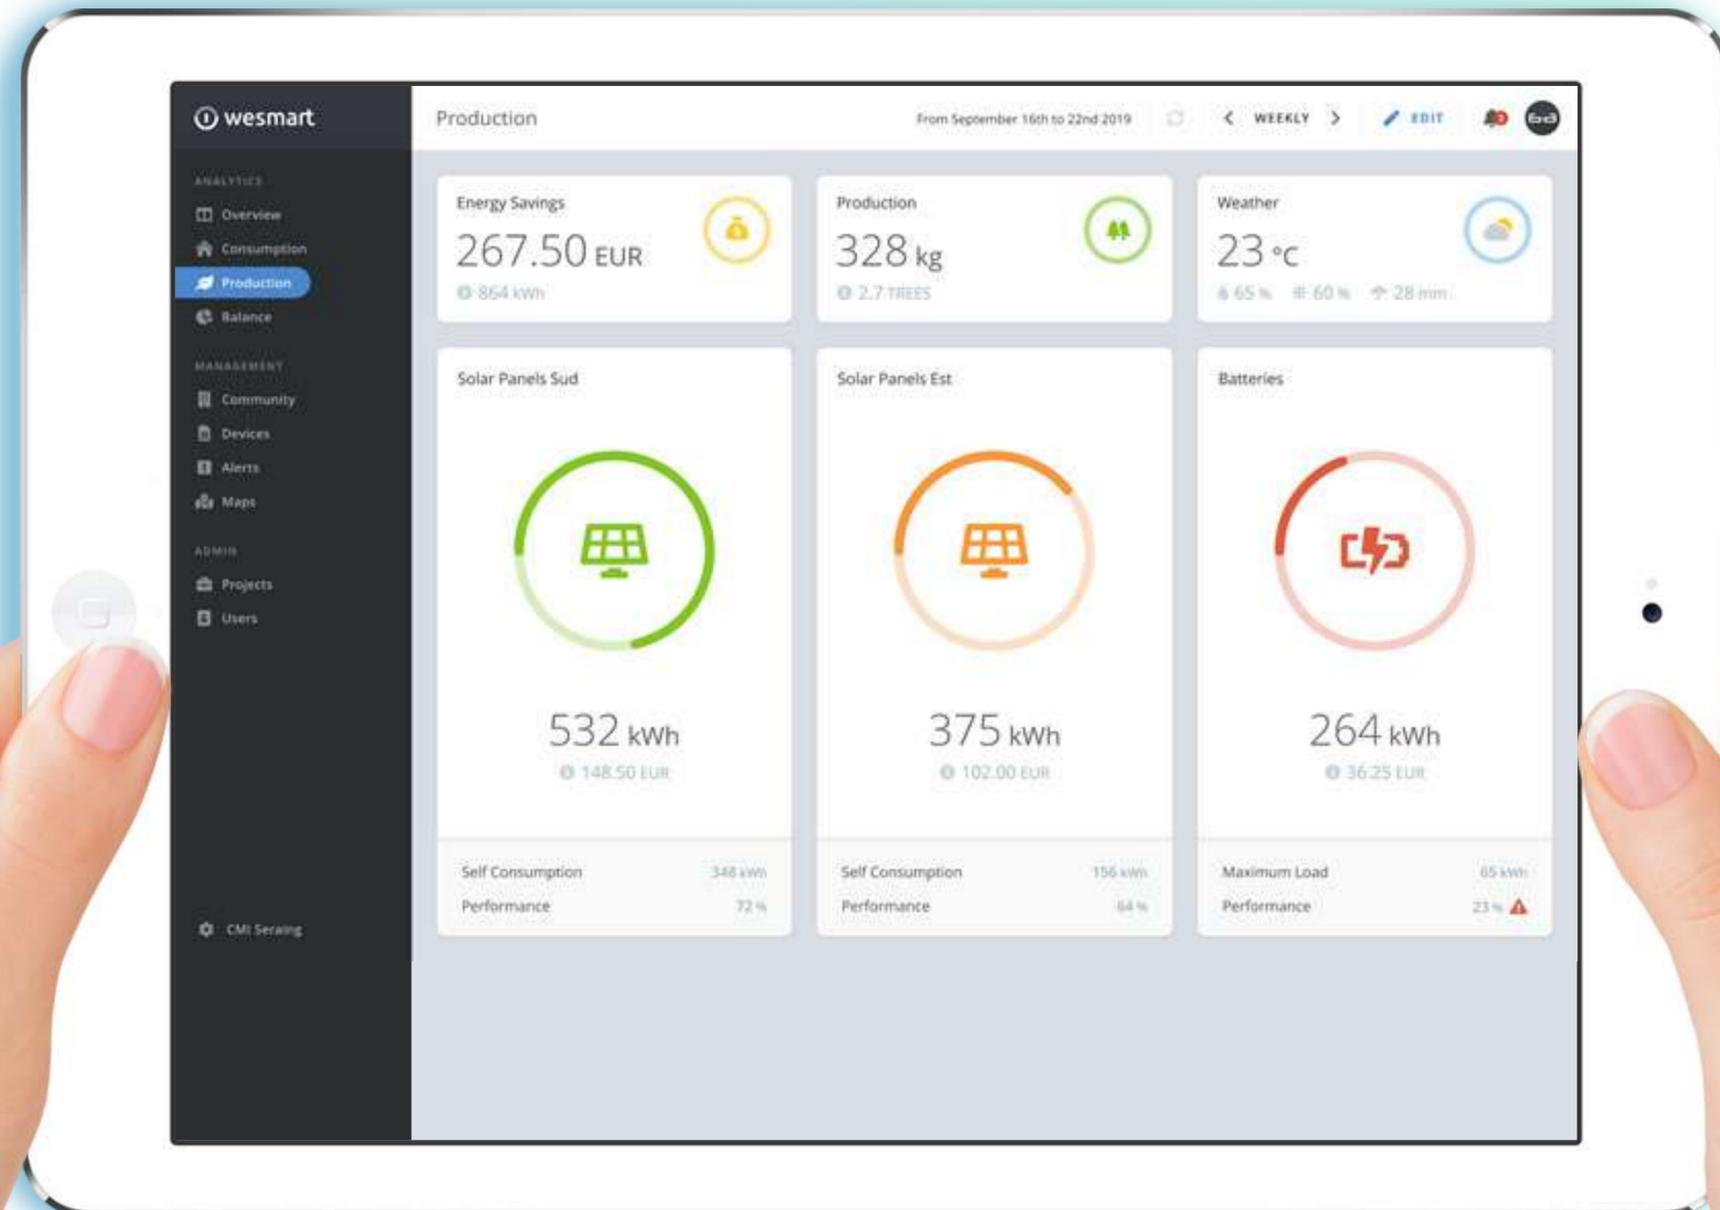

# Your automated community manager

The WeSmart platform acts as a **true Energy Manager**

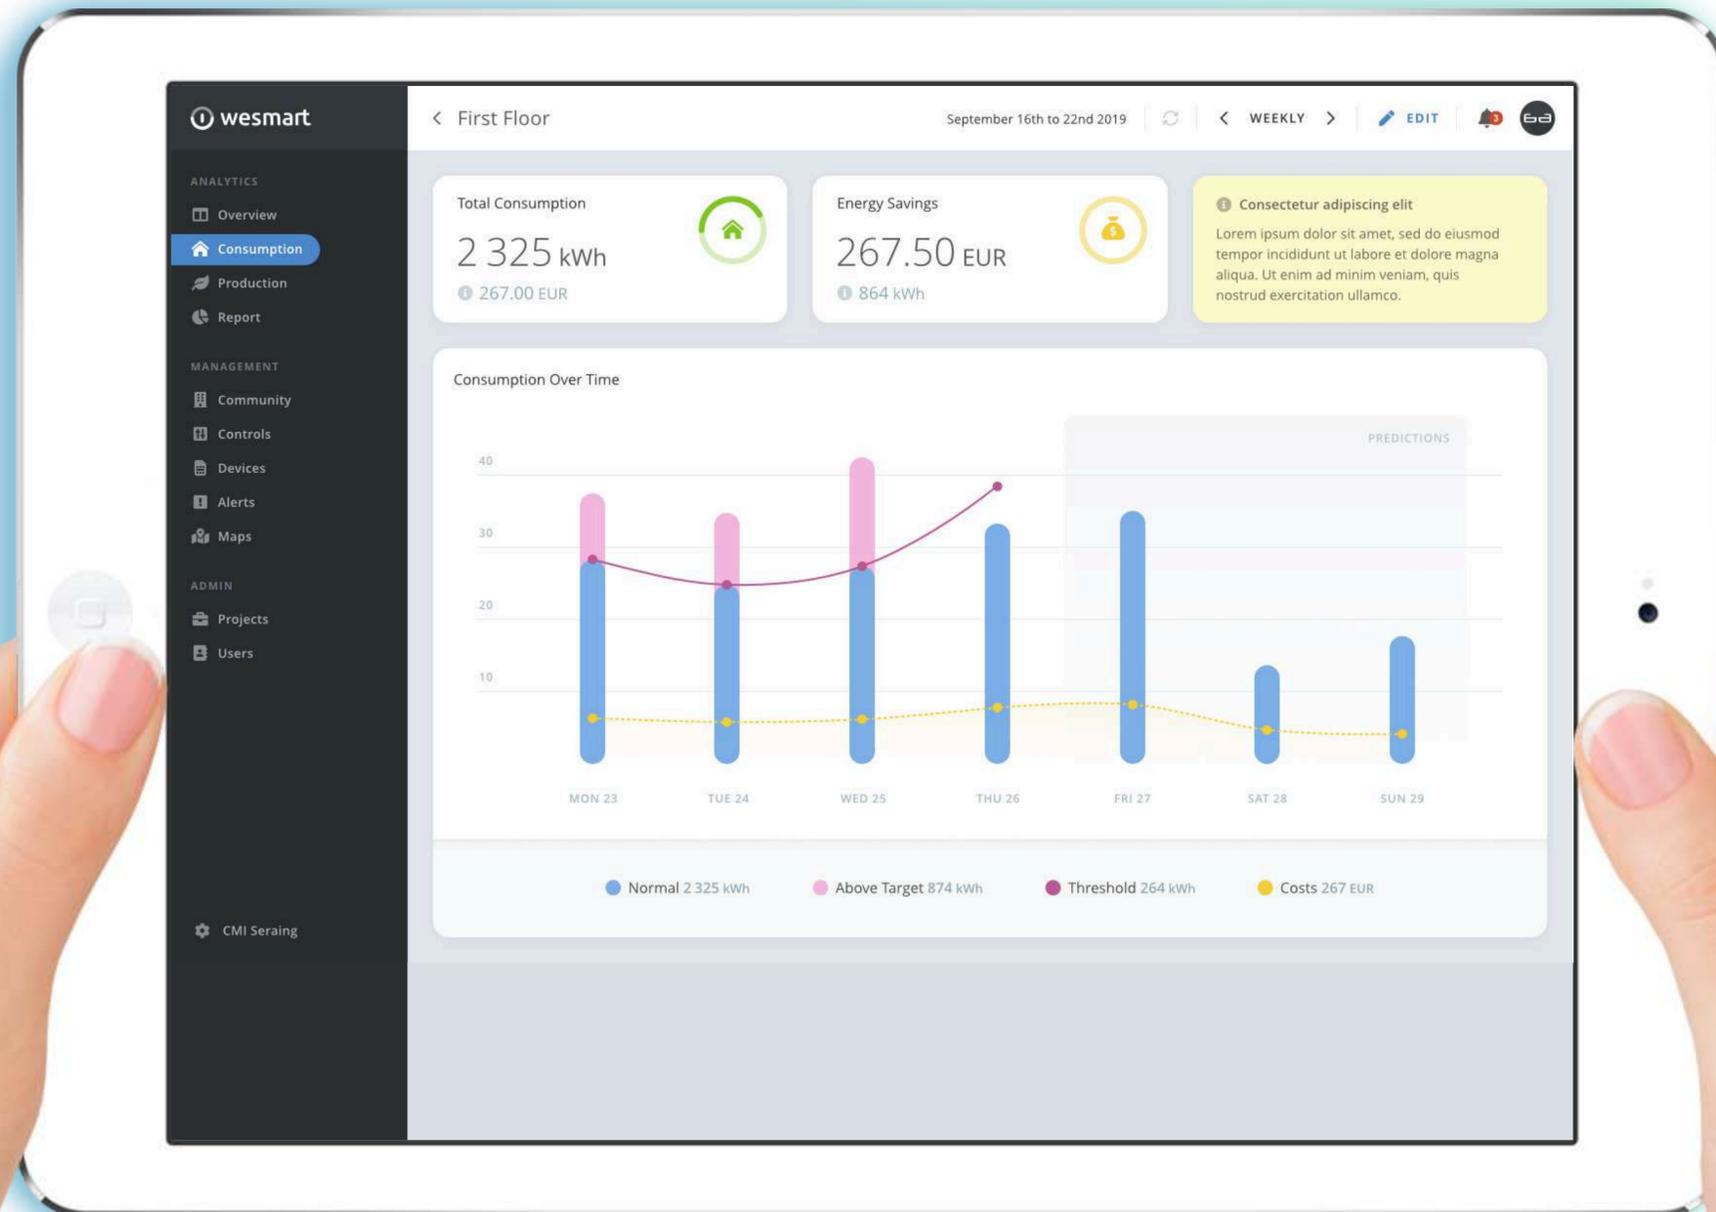

- Monitor
- Forecast
- Mutualize
- Settle

your energy production,  
storage, consumption.

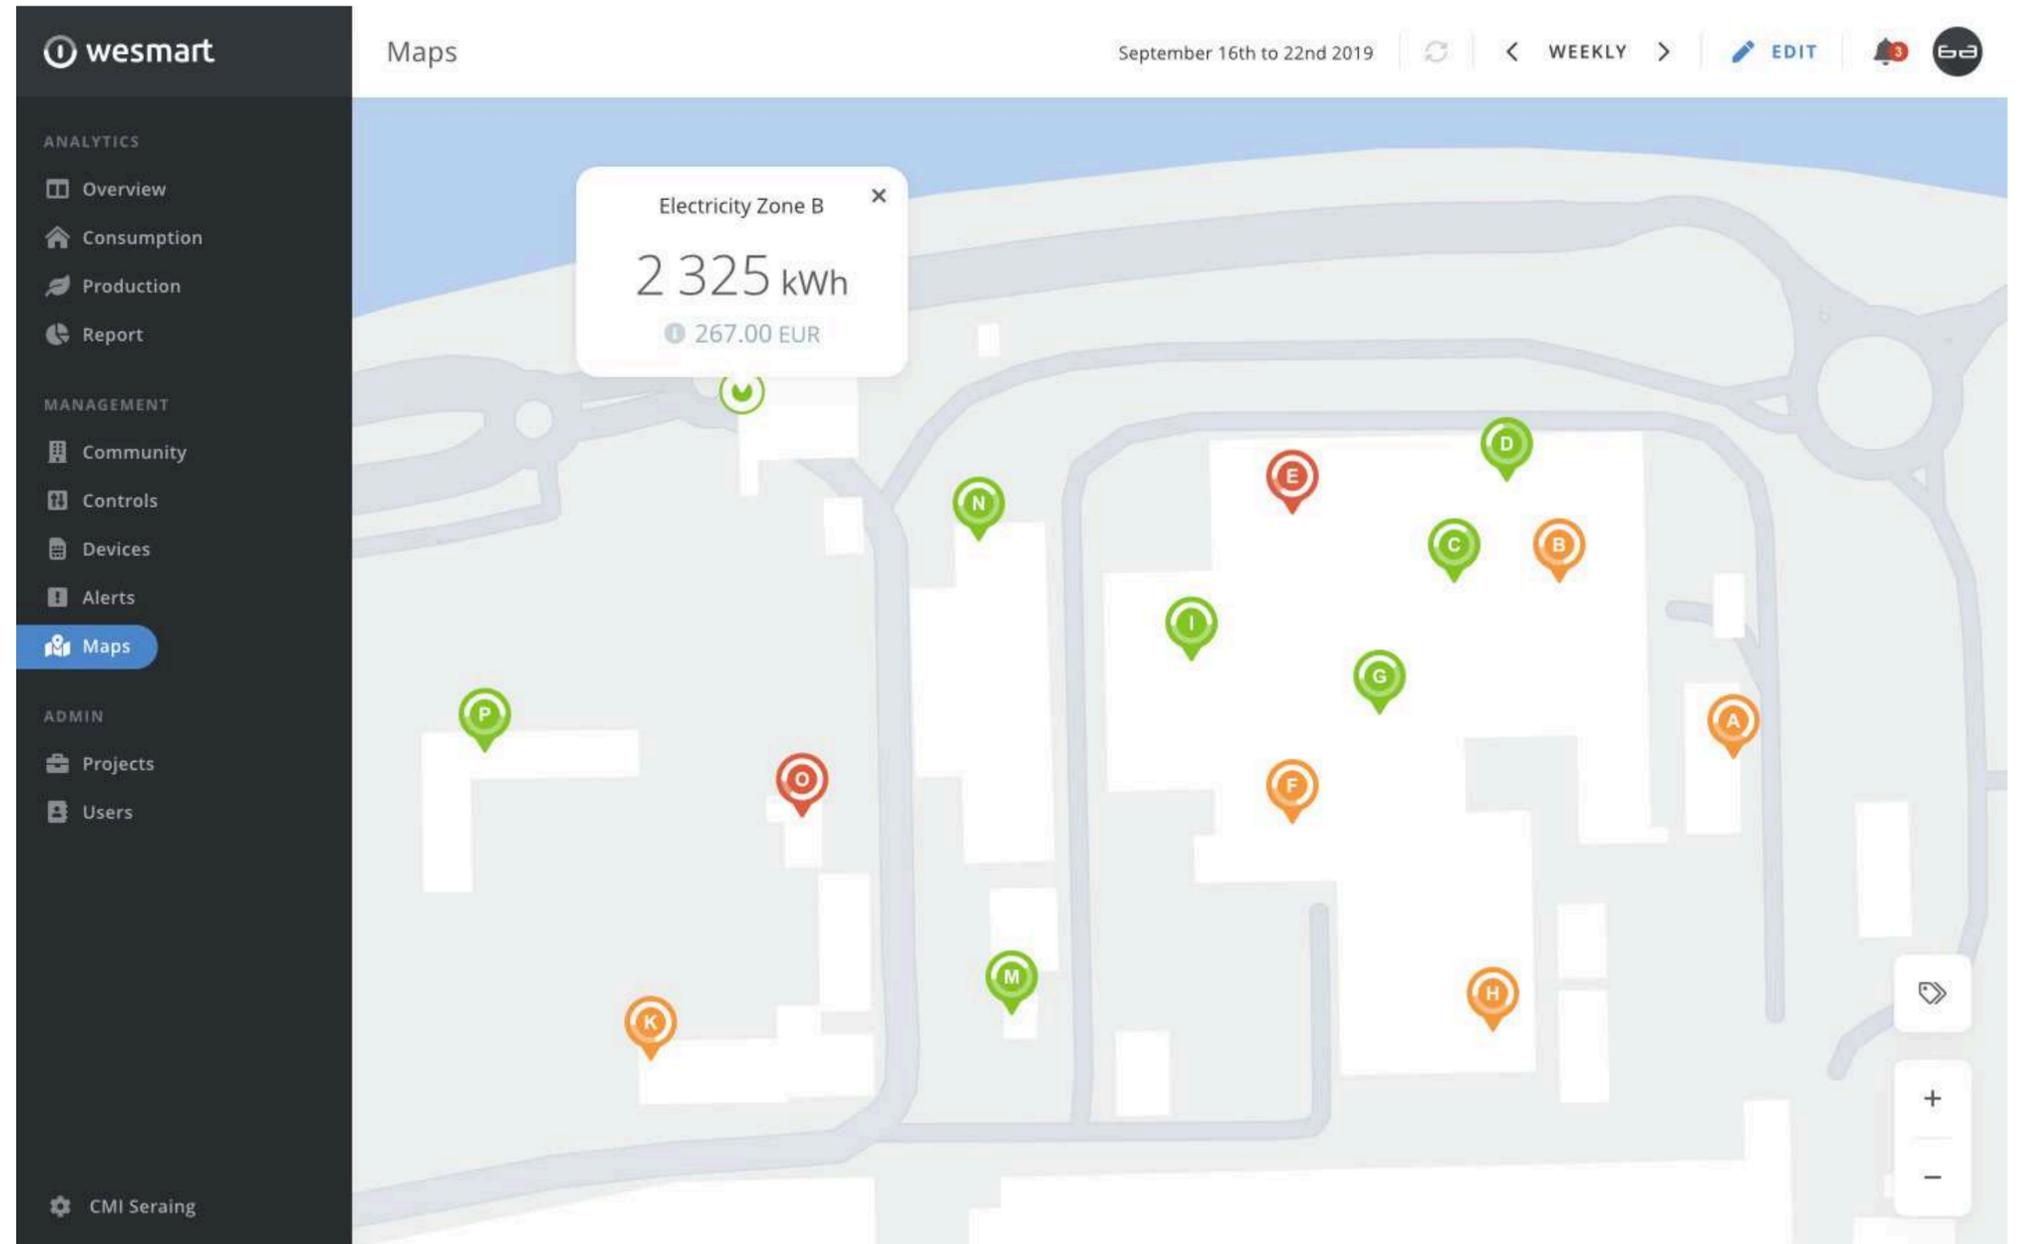

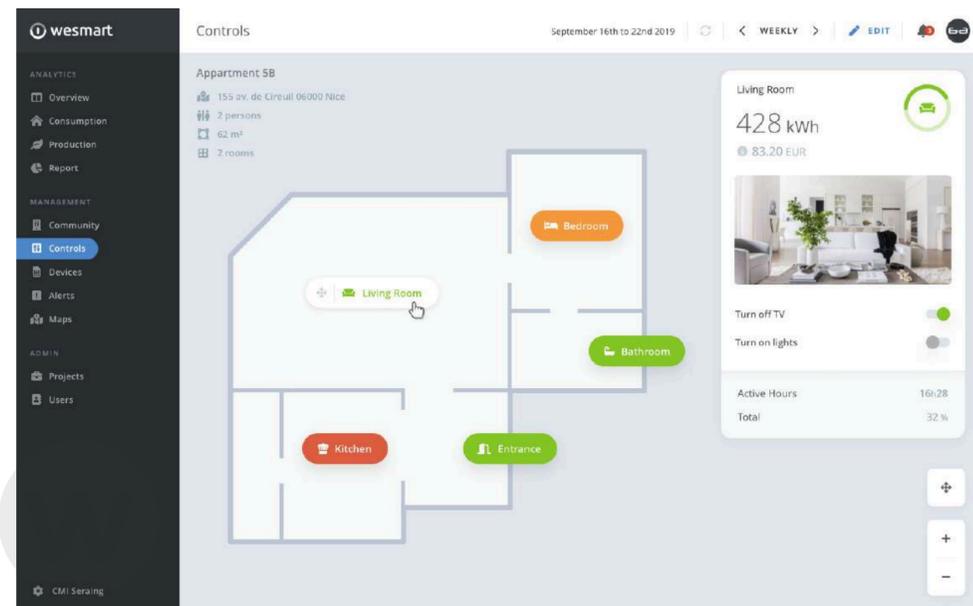

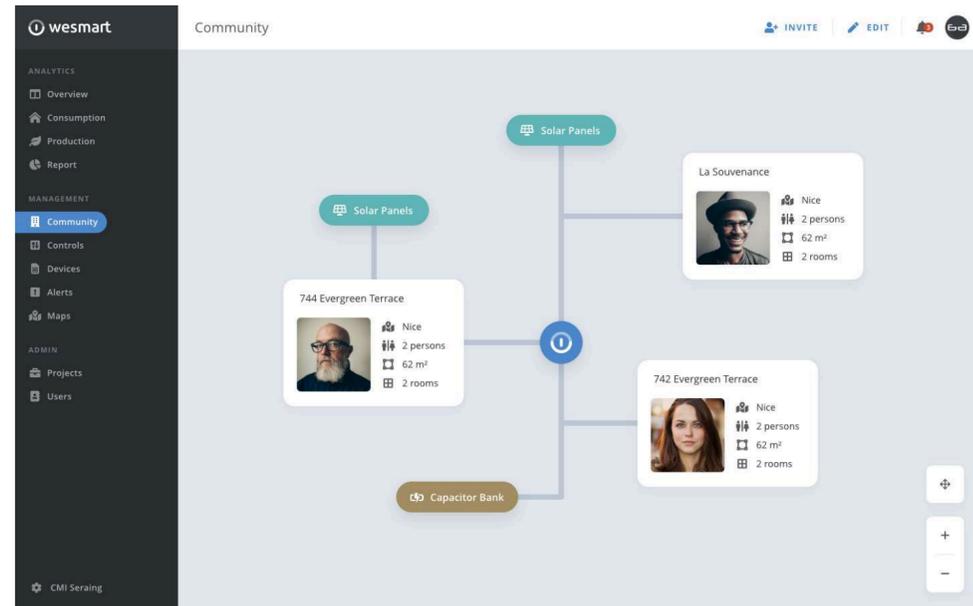

# Your automated community manager

## Activity monitoring

# Your automated community manager

## Activity monitoring

# Maximum engagement!

Enter Energy Saving contests and Win!

Gamification

Spend less on energy while keeping the same quality of life and win!
